

A Better Value Than Foam

1. **BETTER STABILITY THAN FOAMS = FEWER EXAM RETAKES** - Helps to reduce patient movement during exams resulting in fewer retakes. General Hospital Oberengadin (Switzerland) has used the product for more than one year and has seen retakes reduced by 50%. *If you save just one retake per month the product pays for itself many times over.*
2. **EASIER TO USE THAN FOAMS = TIME SAVINGS** – The product can individually adapt and fill the space between the patient and coil with a matter of a few squeezes of the pump. A recent customer survey conducted in Switzerland confirms that on average the set-up time is reduced by 30% over foams. *Saving set-up minutes in your workflow leading to better throughput*
3. **BETTER HYIGENE THAN FOAMS = SAVE MONEY BECAUSE THERE IS NO NEED TO DISPOSE OF THE PRODUCT IF SOILED** – The Pearltec products unlike foams has two protective surfaces. First the single use disposable covers offer a level of individual protection and the product surface can be easily sanitized with any sanitizer. *There is no need to dispose of product because you cannot get it clean or its protective surface is destroyed.*
4. **BETTER PATIENT COMFORT – PATIENTS FEEL MORE AT EASE** with the Pearltec engineered positioning pad design. Better patient comfort leads to less movement, hence to less retakes. A survey at the University Hospital of Bern (Insel) reinforces the importance of the patient comfort.

“The patients experience the device as cushy and comfortable, and it helps them to lie motionless.”

Carole Stucker, Lead Radiographer, INSEL Bern

***Replaces foam in these exams;
Head, Shoulder, Wrist, Hand,
Knee and Ankle and Foot***

**PEARLTEC PRODUCTS COME WITH A FULL 1 YEAR
REPLACEMENT WARRANTY**
