

BabyFix Cocoon

Safe as a cocoon – Soft as a butterfly's wings

Ideal conditions for a safe and careful examination procedure for newborn babies in the MRI scanner

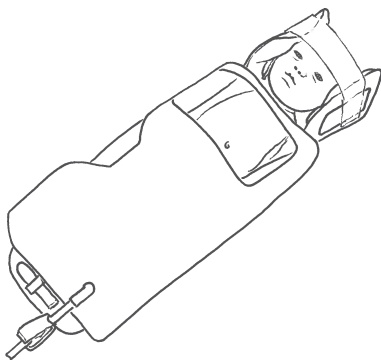

« In addition to the deployment of the BabyFix Cocoon for **feed-and-sleep MRIs** for newborn patients taking place under the responsibility of neonatologists, the anesthesiologists also repeatedly positioned sedated infants (with a body weight of up to approximately 5 kg) in the BabyFix Cocoon in order to test the practicality and (heat) insulation effect. In the cases I am aware of, **the baby was positioned without any problems**, sometimes with an additional neck role, with no vacuum being created in most cases. Neither **cooling** nor **overheating** occurred. All staff members found the BabyFix Cocoon **helpful** and **practical**.

The Benefits

MRI scans for newborn babies are not an everyday occurrence and pose special challenges for everyone involved due to the difficulty of achieving safe and stable positioning. To meet the high demands of this procedure, the BabyFix Cocoon was developed in close collaboration with experts from the fields of neonatology, anesthesia and pediatric radiology.

-  **Increased sense of wellbeing for parents and child**
The slim design and the separate head and body fixation enable the mother to continue breastfeeding, thus facilitating close contact between her and the child during preparation for the scan. Careful, pressure-free positioning with soft, pleasant materials.
-  **Optimized work flow**
Easy to use and intuitive enabling routine-based work in interdisciplinary teams.
-  **Increased patient safety**
Permanent monitoring of vital functions through an integrated viewing window and simple routing and strain relief for monitoring cables via an in-built hose stopper.
-  **Improved image quality**
Stable, stretched and centered positioning of the baby's head and body possible without any problems, even in narrow coils.
-  **Excellent hygiene**
High-quality materials can be cleaned easily and consistently until they are free of all residues, thereby facilitating reliable protection.

Simple and intuitive to use in just a few steps

Lay the newborn baby on the positioning aid.

Close the BabyFix Cocoon tightly

Holding and breastfeeding is possible in the positioning aid.

Compatible with all common head coils.
