EVault Cloud Disaster Recovery Service— Backup-Independent, 4-Hour SLA Option

DISK-O-TAPE, INC.

Key Benefits

- Guaranteed fast recovery via real-time replication
- Secure, unlimited cloud access via VPN connectivity
- Lower total cost of ownership
- Zero downtime for planned outages (proactive failover)
- Worry-free DR process—planning, testing, documentation, management, and recovery handled by EVault experts

Get backup-independent, managed recovery of critical systems within four hours—guaranteed.

If even four hours of downtime (unplanned or planned) is too costly for your organization—but you're not ready to rip and replace your backup solution or build your own disaster recovery (DR) site—you need EVault® Cloud Disaster Recovery Service with the 4-hour SLA (service-level agreement) option. Keep your existing backup technology. Our complete, cloud-based DR service, managed by EVault experts, means no large, upfront capital investments—and no more worrying about downtime. Just a cost-effective guarantee that we will keep your business running.

Ensure Your Business Will Be Back Up and Running Fast—No Matter What

EVault Cloud Disaster Recovery Service with the 4-hour SLA option replicates your critical systems from your data center to the ironclad EVault cloud in real time as virtual machines (VMs). The VMs are always on, receiving replicated data over the wire. All you need is an Internet connection to gain secure access, via a remote SSL VPN, to your data and applications in our cloud. And you can continue to access your critical systems and data until your physical site is operational again.

In addition to ensuring rapid recovery from unplanned disruptions, the service's real-time replication gives you proactive failover capabilities for continuous uptime during planned outages. You just switch your systems to the EVault cloud and quickly establish secure, remote access at no additional cost—whenever you choose. Your key systems stay available during planned maintenance, upgrades, and outages.

Your Data Is Safe with Us

End-to-end encryption helps ensure your data remains private, satisfying regulatory-compliance requirements. Plus, your data is replicated in the EVault network of top-tier and SSAE16-compliant or ISO-certified data centers. These facilities feature a virtualization platform for best-in-class redundancy and performance, high availability, and superior storage efficiency.

Lower Your Total Cost of Ownership—Let EVault Do the Heavy Lifting

The 4-hour SLA option is compatible with your current backup solution. So you eliminate the large, upfront capital expenses and ramp-up costs required to build and run your own DR site, and you protect your existing investment in backup technology.

Datasheet

EVault Cloud Disaster Recovery Service—
Backup-Independent,
4-Hour SLA Option

At A Glance

Protected Platforms

- Windows Server 2003, 2008, and 2012; Microsoft Exchange, SQL Server, File Server, and SharePoint; Blackberry Server; and others

Comprehensive Package

- Includes Hosted Active Directory VM, storage, secure network protocols, SSL VPN and IPsec Tunnel

Cloud Infrastructure

- Remote, top-tier data centers serving as an extension to your production environment (a hot cloud)

DR Tests

- One (1) complete DR test

When you adopt the cloud for DR, you also benefit from lower operating costs achieved through multitenancy, and shared and virtualized resources. These resources are nearly limitless, always on, and ready to scale when you need them most. Bottom line: you get lower TCO and DR on demand.

Rely on the Experienced EVault Team of DR Specialists—Always by Your Side

The EVault team of experts takes care of DR planning, testing, and documentation and, in the event of a disaster or planned outage, we will guide the recovery process to minimize or eliminate disruptions to your business. We'll test the service with you before it's activated, helping ensure accurate and effective post-disaster execution. After testing, you'll receive a Disaster Declaration Card as well as a fully documented DR plan tailored to your specific environment, which will help you pass compliance audits.

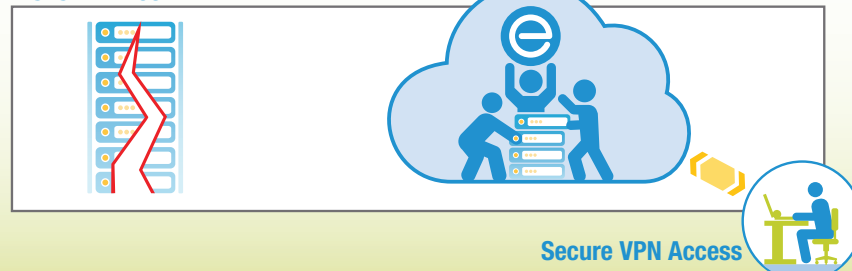

If a disaster strikes, call our 24x7x365 disaster declaration hotline. You will have remote access to your key systems in a secure, virtual environment in four hours or less. Guaranteed.*

HOW IT WORKS

Scenario 1: NORMAL REPLICATION TO EVAULT CLOUD

Scenario 2: DISASTER RECOVERY

* The guarantee is set forth in the EVault Cloud Disaster Recovery Service SLA, and includes service credits and the right to terminate if the guarantee is not met.
