

EVault Cloud Backup Service

Data Sheet

Key Benefits

- Easy, automatic data protection
- Secure and reliable
- No capital expense or IT staff
- Ensured recovery
- Centralize management
- Easy regulatory compliance
- Broad operation system, hypervisor and application support
- Expert help 24/7/365

Get the best of both worlds: local and offsite backups and restores.

EVault® Cloud Backup Service* securely, reliably, and efficiently protects your organization's critical data, directly over the Internet so you don't incur additional capital or IT expenses. Automatically back up desktop, laptop, and server data from across your organization and use a web browser to configure your desired backup policies and monitor your backups. Our cloud-based backup and recovery subscription service deduplicates, compresses, encrypts, and then transmits the data to one of our top-tier data centers, managed by EVault experts. You know that your data is protected by industry experts, according to the highest standards of security and reliability. And recovery is at your fingertips whenever you need it.

How It Works

EVault centralizes the backup and recovery of data on all computers distributed throughout your organization—headquarters as well remote and branch office (ROBO) locations. Agents automatically back up your data over the Internet to a highly secure data center. You monitor and manage everything within a web browser. Recovery is just as easy: when you need to restore data, simply navigate to the recovery point via an intuitive interface, then click. EVault Reports provide details about the status of your backups.

Secure, Reliable Data Protection Infrastructure

- Our lights are always on managing petabytes of data in multiple state-of-the-art data centers. This ensures your data is stored at the highest classification levels for data center reliability and performance.
- Hot backups support 24/7 operations by backing up mission-critical applications while they are online.
- Independent SSAE 16-compliant audits, completed every year, guarantee our facilities and processes conform to the highest industry standards.
- FIPS-approved AES encryption protects your data in transit and at rest in our cloud-only you have the key to unlock and access it.

Easy Deployment and Management

- Get real-time collaboration with colleagues or the EVault Customer Service team via a social platform portal.
- Manage and monitor the health of your backup environment.
- Troubleshoot failed backups with greater speed and accuracy

Ensured Compliance with Data Protection Policies and Regulations

- Best-practice retentions (30 dailies and 11 monthlies) are standard.
- To retain data for longer than one year, our cloud-based long-term retention service lets you manage your data retention from the same user interface as your backups.
- EVault Reports provide instant, centralized, and accurate information about your entire backup and recovery process.

Optimized Performance with Advanced Compression and Data Deduplication

- Front-end data deduplication uses EVault delta block-level processing technology to ensure only new and changed data blocks within files are sent to storage, decreasing backup times.
- Compression technology and bandwidth throttling maximize backup transfer speed and minimize impact on productivity.

World-Class Customer Support

- Our data protection experts are available 24/7/365 at no additional cost to you.
- EVault Professional Services teams can help you design, test, and execute your data protection strategy.

Extensible Subscription Services to Meet Your Recovery Time Objectives

- Single-pass system and data recovery using bare metal capabilities
- Accelerated recoveries using onsite virtual or physical appliances
- Guaranteed recovery time options in case of sitewide or regional disaster.

Advanced Recovery Options to Meet Your Needs:

- Bare metal/system recovery
- Dissimilar hardware
- A new location
- Physical to virtual server
- Virtual machine
- File & folder
- Application level
- Granular recovery

Take the Next Step
